

Smarter access. Clearer risk. More focused response.

Three cybersecurity ideas that work better together.

ZTA

Zero Trust
Architecture

GRC

Governance, Risk
& Compliance

SOC

Security Operations
Centers

Swipe to see how the connections sharpen decisions.

Access decisions should change with the context.

FOUR SIGNALS. ONE ADAPTIVE DECISION.

●
IDENTITY

Who is asking?

●
DEVICE

Is it healthy?

●
RESOURCE

**What is
requested?**

●
DATA

How sensitive?

Continuously evaluated as conditions change.

Risk needs owners. Compliance needs evidence.

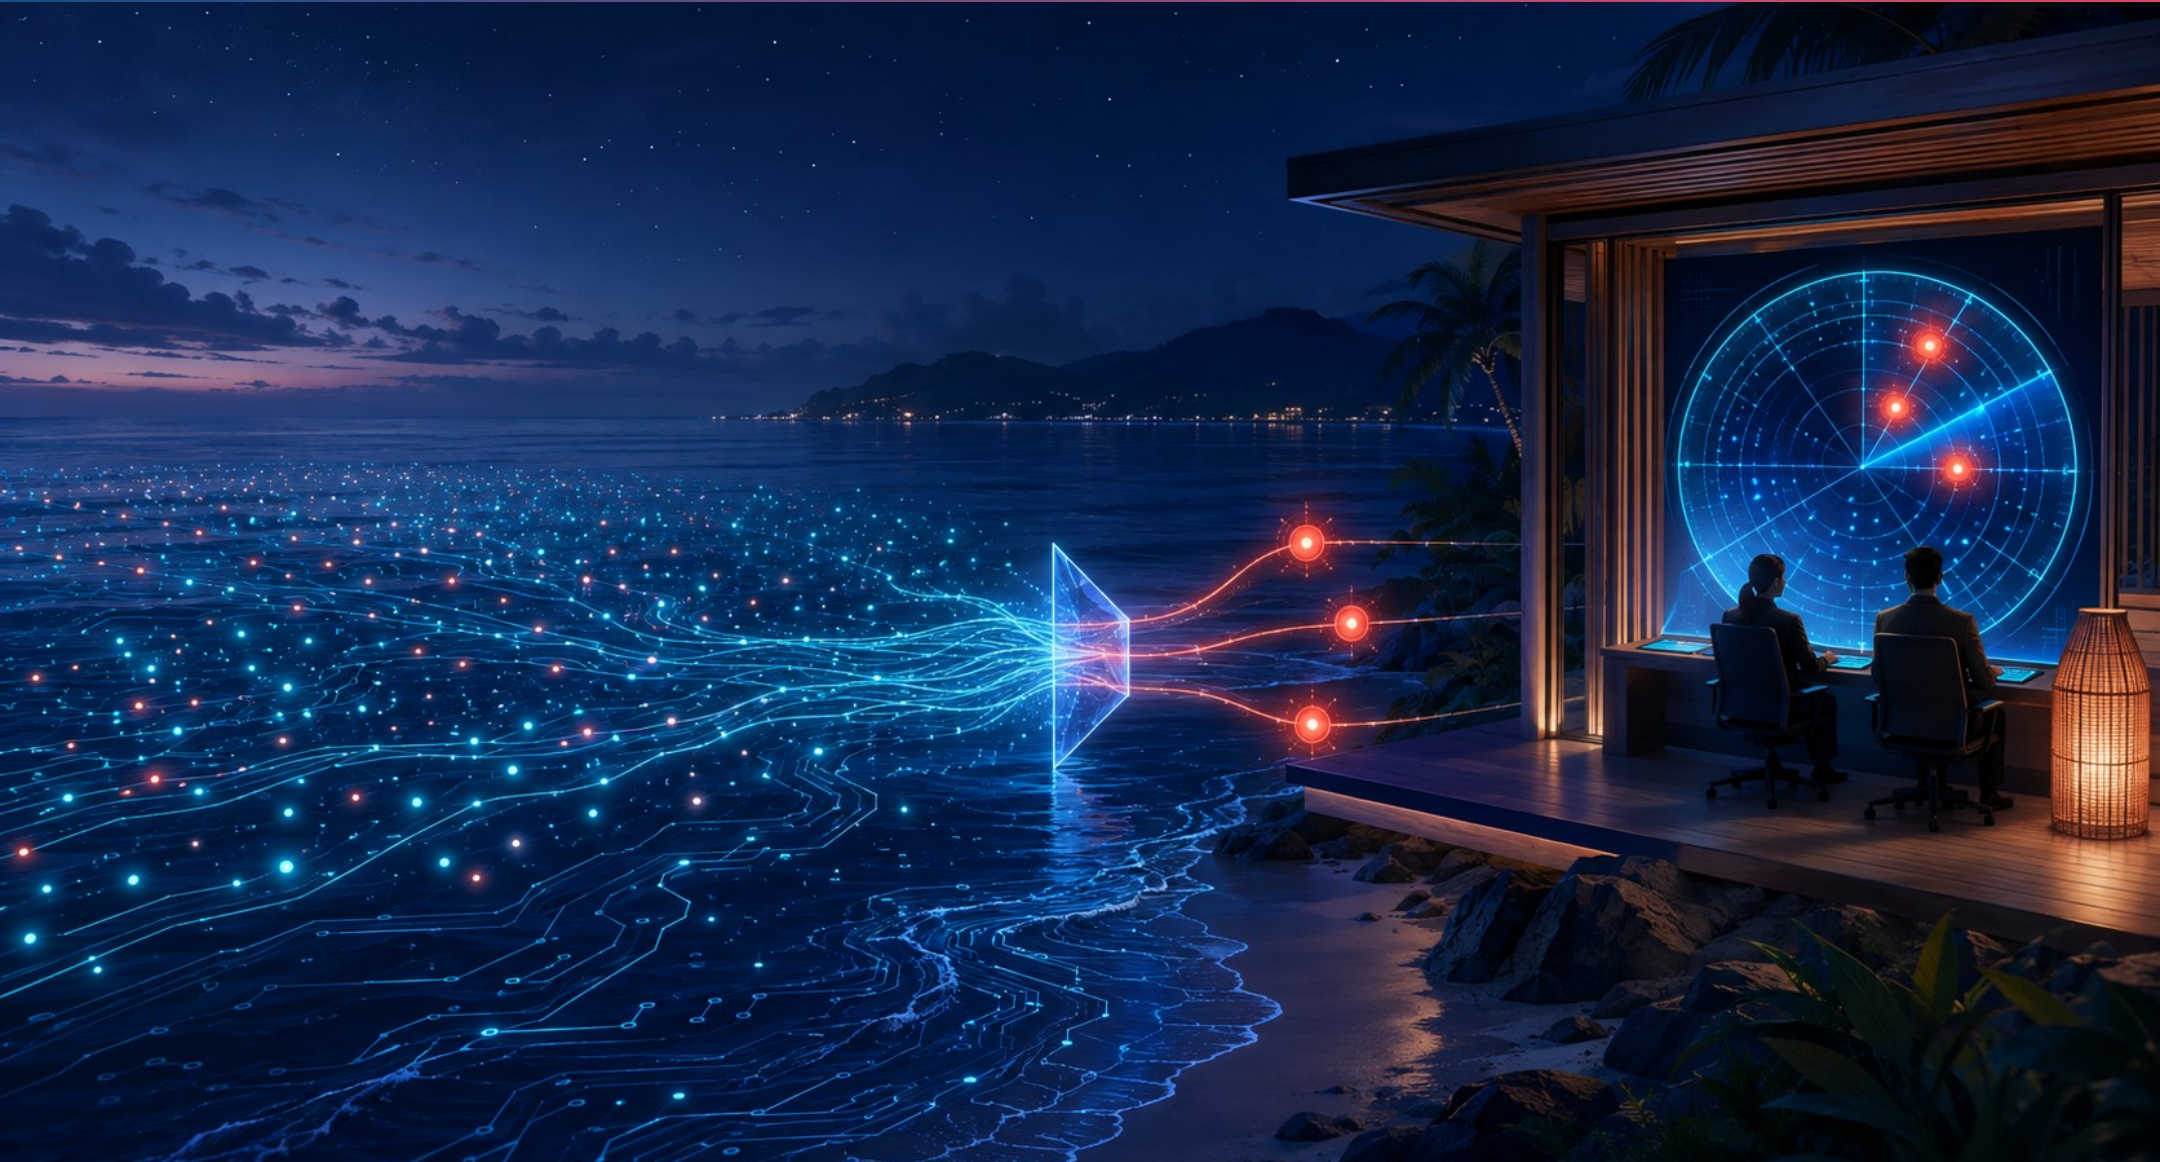

ONE CONNECTED WORKFLOW

Prioritize what matters. Prove that action was taken.

Help analysts focus on the threats that matter.

TURN ALERT NOISE INTO FOCUS

01	02	03
DETECT	PRIORITIZE	AUTOMATE
Unusual behavior	Meaningful threats	Repetitive response

More analyst time for serious threats and higher-value decisions.

THE CONNECTED VIEW

Stronger connections. More informed decisions.

Access, risk, and response work better as one connected system.

THREE QUESTIONS. ONE MISSION VIEW.

ZTA

Should this access
be allowed now?

GRC

Which risks require
action and proof?

SOC

Which threats need
an analyst's
attention?

Connected by better information.
